Early-career software developer with a BEng in Information Technology and experience delivering and maintaining a live web-based business system for a restaurant client in Finland. Strongest in clarifying business needs, defining system rules, integrating customer and administrator workflows, manual testing, deployment support, troubleshooting, and production maintenance. Seeking junior backend, software development, or backend-oriented full-stack opportunities. Authorised to work full-time in Finland.

TECHNICAL SKILLS

Programming: TypeScript, JavaScript, SQL, Python

Backend & Data: Node.js, Express, REST APIs, PostgreSQL, Prisma

Web Project Experience: Next.js, React, React Native

Testing & Delivery: Git, Docker Compose, Swagger, Postman, Browser DevTools, Linux/VPS deployment

SOFTWARE EXPERIENCE

404found, *Freelance Software Developer* Mar 2025 – Present | Oulu, Finland

- Delivered and continue to maintain a live restaurant platform supporting reservations, takeaway ordering, menus, announcements, and administrator workflows.
- Worked directly with the client to translate operational needs into defined features, reservation rules, administrator exceptions, and expected system behaviour.
- Worked across Next.js frontends, an Express and Prisma backend, PostgreSQL, and Docker-based deployment, integrating and manually testing customer and administrator workflows.
- Supported deployment and production maintenance through release checks, issue investigation, rollback of a faulty change, and verification of fixes.
- By August 2026, the system had processed more than 2,100 non-cancelled reservations and remained in active use.

PROJECTS

X-it Escape Room App, *React Native, JavaScript | Erasmus+ international team project* Feb 2025 – Apr 2025

- Contributed map, venue-listing, and user-profile views connected to existing backend APIs in an English-speaking international team.
- Worked from shared requirements, integrated API data with frontend state, and documented implementation details for the team.

EARLIER ENGINEERING EXPERIENCE

HVAC Engineer Approx. 4 years | China

- Reviewed technical drawings, coordinated with design and construction disciplines, and helped resolve site conflicts during project delivery.
- Supported technically demanding work including a Class 1,000 cleanroom whose HVAC scope passed third-party testing and acceptance.

EDUCATION

Bachelor of Engineering, Information Technology Aug 2023 – Apr 2026 | Oulu, Finland

Oulu University of Applied Sciences

GPA 4.53 / 5 | Completed about one year ahead of schedule

Additional training: Harvard CS50x; built a Flask and SQLite web application as the final project.

LANGUAGES

English: Professional working proficiency | **Mandarin Chinese:** Native
