PROFILE

I'm an IT student who likes building practical web apps and learning through hands-on projects. Over the past year, I've helped develop a restaurant platform for a real business and worked with an international team on a mobile app. I've been involved in backend logic, frontend features, database design, and deployment using tools like Docker and GitHub Actions. I'm comfortable thinking through real-world problems, breaking down features, and helping turn them into working systems. I've also used English in team communication, project documentation, and user-facing demos. Now I'm looking for an internship or junior developer role where I can keep growing, contribute to real products, and work alongside experienced teammates.

SKILLS AND INTERESTS

Languages — TypeScript, JavaScript, Python, Java

Frontend — Next.js, React Native, Responsive UI

Backend — Node.js, Express.js, Flask, REST API Design

Databases — PostgreSQL, MySQL, Prisma

DevOps & Tools — Docker, Git, GitHub Actions, CI/CD, Linux, Swagger, Oracle Cloud

LANGUAGES

English: Upper Intermediate (B2) | **Mandarin:** Native | **Finnish:** Beginner (Learning)

PROJECTS

Okiniiri Web Platform, *Full-stack Developer* | Next.js, Mar 2025 – Present
Express.js, TypeScript, PostgreSQL, Docker, Oracle Cloud

- Built a full-stack web system for a real restaurant group in Finland.
- Created a bilingual (Finnish and English) frontend with Next.js, implementing page routing, next-translate-based internationalization, and dynamic form validation.
- Designed backend APIs using Express.js and Prisma ORM, covering restaurant info, booking logic, feedback submission, and JWT-based user auth.
- Documented API endpoints with Swagger to support frontend integration and internal testing.
- Wrote database models and handled all PostgreSQL schema design and migrations.
- Used Docker throughout local development and deployment, and set up CI/CD pipeline with GitHub Actions for automated delivery to Oracle Cloud.
- Set up Cloudflare Access for staging and tested all features with real users.

X-it Escape Room App,

Feb 2025 – Apr 2025

Frontend Developer | React Native, JavaScript, Docker

- Collaborated with Dutch students to develop a mobile app inspired by escape room gameplay as part of an international student project.
- Built company-facing features such as room listing, editing, and interactive map views using React Native.
- Implemented login functionality and connected the frontend to backend services via REST API calls using fetch.
- Took part in testing and presented the finished app during the final demo session.

Movie Information and Showtime Platform,

Oct 2024 – Dec 2024

Backend Developer | React.js, Express.js, PostgreSQL, Git

- Built backend APIs for movie search, filtering, and group features using Express.js.
- Fetched movie data and schedules from TMDB API and Finnkino XML, converting them into usable formats.
- Helped organize project setup and Git repo structure, and handled weekly team reporting.
- Delivered a complete backend for a working prototype used during final demo.

Bulletin Board System (BBS),

Mar 2024 – May 2024

Backend Developer | Node.js, Express.js, PostgreSQL

- Built features for posting and commenting from scratch.
- Designed the database and wrote backend endpoints.
- Worked closely with the frontend team to test and fix issues.
- Helped the team ship a working full-stack BBS with login and post functionality.

EDUCATION

Oulu University of Applied Science,

Aug 2023 – Jun 2027 | Oulu, Finland

BEng, Information Technology

- Completed 140 ECTS credits as of July 2025
- Relevant courses: Advanced Software Development, Java Programming, Cloud Services, Data Analysis

OTHER EXPERIENCE

Wuxi Yosun Equipment Installation Co.,Ltd.,

Apr 2022 – Jul 2023 | Wuxi, China

HVAC Engineer

- Designed HVAC systems for large factories in coordination with design and construction teams.
- Collaborated with clients and cross-functional teams to ensure technical requirements were met.
- Overcame on-site challenges through teamwork and effective communication, ensuring project timelines and quality standards were achieved.

Kone Elevator Co., Ltd., Environmental Engineer Assistant

Aug 2018 – Nov 2018 | Kunshan, China

- Assisted with sample tests and wastewater system operations.
